

V Lakshmi Srujana

Bengaluru, India — +91-9880499896 — lvalmik@gitam.in — github.com/lkshi0406 — LinkedIn

Professional Summary

Computer Science Engineering student at GITAM University with hands-on experience building backend systems and full-stack web applications using Java, Python, and PostgreSQL. Developed and deployed a URL Shortener service with REST API logic and database optimization. Active problem solver with consistent DSA practice across LeetCode and GeeksforGeeks focused on Trees, Graphs, and Dynamic Programming. Proven leadership through technical event coordination and community building.

Education

GITAM University, Bengaluru Expected 2027
B.Tech in Computer Science Engineering
CGPA: 8.55 / 10

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Technical Skills

Languages:	Java (primary), Python, C++, SQL
Backend:	REST API development, URL routing, database integration, server deployment
Databases:	PostgreSQL, relational schema design, query optimization
Web:	HTML, CSS, responsive design
Tools:	Git, GitHub, VS Code, Postman, Render
Cloud:	AWS fundamentals (EC2, S3), basic cloud architecture concepts
CS Fundamentals:	DSA, OOP, DBMS, OS, Computer Networks

Experience

Web Developer – Consultancy Project 2025

- Built a responsive client portfolio website from scratch, translating requirements into structured HTML/CSS layouts.
- Designed reusable, maintainable component architecture to support future updates with minimal rework.
- Ensured cross-device compatibility through responsive design techniques, improving usability across mobile and desktop.
- Managed the complete development lifecycle using Git for version control and iterative delivery.

Projects

URL Shortener 2026

- Designed and built a backend service in Python to generate unique short codes and handle HTTP redirection.
- Modeled a normalized PostgreSQL schema to store URL mappings, creation timestamps, and access metadata.
- Optimized database lookup queries using indexed columns to reduce average redirection latency.
- Deployed the service on Render with environment-based configuration for public access and testing.

Tech Stack: Python, PostgreSQL, REST API, Render

Food Recommendation & Recipe Suggestion System 2026 – Ongoing

- Developing an ML-powered system that generates recipe suggestions from partial ingredient inputs.
- Experimenting with classification and similarity-based ML approaches to improve recommendation accuracy.
- Building a backend API layer to expose model outputs for application integration.

Tech Stack: Python, Machine Learning, REST API

Leadership

GitHub Community Club – GITAM University 2023 – Present

Inclusion Officer (2023–2024) — Expert Team Member & Event Lead (2023–Present)

- Led planning and execution of Epoch 2024 and Epoch 2025 — GITAM's flagship technical events — coordinating teams of 15+ students.
- Drove student engagement through workshops, onboarding programs, and open-source contribution sessions.
- Club recognized with Best Club Award, GITAM University, for consistent delivery of technical initiatives.

Achievements & Recognition

- Top 35 Selected Team – Smart India Hackathon
- Medal for Distinction – Pre-University Course (PUC)
